

AI Accelerator

**One problem. Seven days.
A working AI solution.**

The AI mandate has landed on everyone's desk. **The starting point hasn't.**

Most property and facilities teams already have the raw material for AI sitting in their systems. The Accelerator turns one real operational problem into a working pilot on your own data.

The AI Accelerator

A focused engagement designed to show you what your data can actually do with AI before you commit to anything bigger.

7 DAYS

Start to finish

1 PROBLEM

A real operational problem

YOUR DATA

Systems, documents and spreadsheets

FROM USD 7,500

Focused, low-risk engagement

NO SMART-BUILDING INFRASTRUCTURE REQUIRED

No long-term commitment | Limited slots each quarter

You already have the data. The question is what it can do.

Customer feedback, work orders, meter readings, tenant requests, inspection photos, contracts and checklists already contain valuable operational information. What's missing isn't more data or another platform. It's one working example of what that data can actually do.

ASK AND GET AN ANSWER

Query years of operational data in natural language.

Example: "Which AHUs have active alarms right now?"

DOCUMENT TO DATA

Extract information from invoices, meter readings and inspection reports.

Example: Automate the reading and re-typing.

LIGHTWEIGHT WORKFLOWS

Give frontline teams a simpler way to capture information and flag issues.

Example: Build the version people will actually use.

Three phases. One outcome.

We work with your team to identify one real operational problem, connect the relevant data, build a working AI solution and put it

PHASE 1

Discover

Find the one problem worth solving.

- Define the problem
- Identify users and data
- Agree what success looks like

PHASE 2

Build

Turn your data into a working AI solution.

- Connect relevant data
- Build around the problem
- Keep the scope focused

PHASE 3

Pilot

Put it to work. Measure the value.

- Use it on real data
- Assess whether it solves the problem
- Map the path to wider rollout

See it work. Then decide what's next.

At the end of the AI Accelerator programme, you don't just have an idea. You have a working pilot, a clearer view of the value and a practical path forward if you choose to take it further.

1 A WORKING PILOT

A functional AI solution built around a real problem and your own data.

2 A CLEAR READ ON VALUE

Evidence of whether the solution is actually helping your team.

3 A PATH FORWARD

A practical view of what a wider rollout could look like.

Find the one problem worth solving

Slots are limited each quarter. Apply and we'll set up a short call to see if it's a fit.
